

The Moyo Foundation

Annual Report 2018

This has been an exciting year for The Moyo Foundation, we are really seeing the positive impact of our efforts. Thank you to the wonderful donors who have made that possible!

What have we done in 2018?

We have sponsored two children through their education this year, we have contributed to a radio tracking collar for one of Mugie's cheetah which will be activated in early 2019, we have been advocating for wildlife corridors across the new road transecting Mugie, and we've been collaborating on a project to promote sustainable bee-keeping and honey harvesting. Moyo purchased 100 'Grace Cups' (reusable menstrual cups) to distribute to Mugie community women and those reached by our outreach health clinics. Moyo has been working with the Mugie Nurse to lay foundations for monthly classes at the Mugie School, furthering empowerment and education about health for girls.

The Team

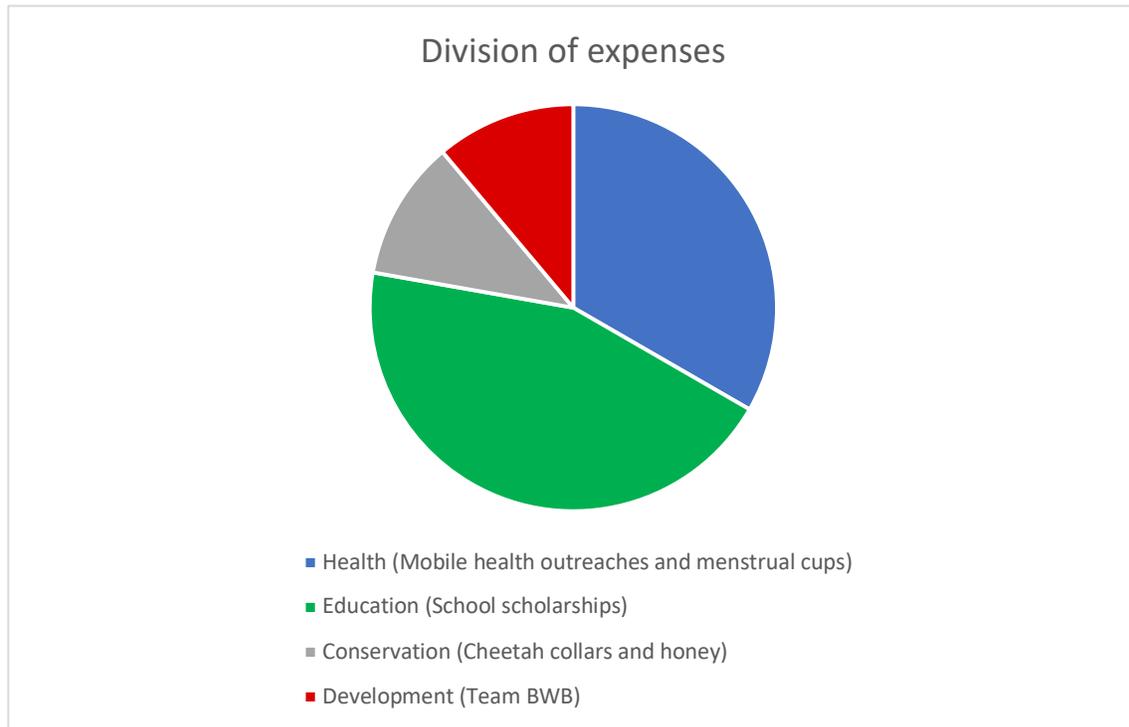

Jake Morgen has joined our Board of Directors and Jedidah, Mugie's nurse has joined the Moyo team, collaborating on all projects relating to healthcare and community education and wellness.

Income - \$10,119.80

All of our donations came from private donations, via several different platforms: including Facebook fundraisers, Mighty Cause 'Giving Tuesday', and website donations. A huge thank you to everyone that supported Moyo this year.

Expense - \$6,090.51

Goals for 2019

In January, we will start our Mugie School 'Health for Girls' class series taught by Mugie's nurse, Jedidah. Topics will include: Menstrual hygiene; Peer pressure and Self Esteem; Female Genital Mutilation; Outcome of early marriage; Alcohol and drugs; Environmental conservation; Importance of education and career choices; Nutrition; Discipline and character. This program of monthly classes for girls, will transition into a mentorship program within the Mugie School.

In February, we plan to buy, and begin renovations, on a mobile health vehicle. If all goes well, we will launch the 'Moyo Health Mobile' to deliver healthcare (with an emphasis on women's health and family planning) to remote communities. The mobile clinic will be stocked with medicines and bring Mugie's nurse and Ekorian's conservation ambassador to meet with people, educating about women's health and hygiene, family planning, and conservation for sustainable development.

We will be sponsoring the education of an additional two students this year – all four students have received full scholarships from Moyo.

Early in the year we will be supporting the mobilization of a new cheetah collar to replace the current collar that has a dead battery. We will continue to apply for grants and advocate for the construction of wildlife corridors. And we will be continuing our work with our sustainable honey project – hoping to sponsor and install hives on Mugie, supporting the local economy.
